The European Union (UE) is an economic, politic and social organization, that cover the most part of the continent Eueopean. Rightnow, it is form by 28 countries but in the beggining in (año en el que se formo) it was formed by only 6 countries. To be part of the UE the country has to have some conditions, like: the econmy of the Marquet, a stable democracy and the acceptance of the legislation, and include the related to the 'euro'. The country must introduce a application of the adhesión. Then if the opinión is favourable, the comisión has to accept a order of talks, that it spends its time for example: Albania, Montenegro and Turkey are countries that it still can't be part of the Union European. All these conditions are named Teatries of Copenhaguen.

Onething of the best things and adventages in the UE is that there isn't any border and the workes can work in the others countries in it.

This Union was based by a lot of treaty between many countries. Its oryigins were after the second world war. The UE started to have an own coin that have it 19 countries to 2, an hymn and a flag and years later integrate the bills. One of the intentions of the Union is that they want to treat all members states how if they were one.

In the Union European the main values are:

Be peace: beacuse if you don't do it you have problems with the people and you can't be in peace.

Security: for example, if others countries attact one of ours, we need to be security to defend it.

Liberty: because every people and country need to be free to express what feel every people and to express a decisión and every decision are in an agreement.

A human dignity: beacuse people need to serious, responsable and to have respect to other people and to himself.

Democracy: is a politic system where the people order.

Equality: we have to respect people with other color of skin and they have the same reasons as us to have a god job for example or we need to have the same equality of a man and a woman.

Discrimination: we have to respect people with other color of skin.

Now there is a history that tell the experience of a woman and his family with one of the values that there are explain, and the history is about one girl that

has problems with one of the values but finally she resolves the problem and all finished perfect:

This is a woman named Miriam, she is a African girl, she is 27 years old, she has been the opportunity and the courage to study two careers and I say the opportunity because is too difficult and take a lot of time, but the problem of her is that in her country she can't work because there isn't many jobs and for a girl it is more complicated because men has more opportunities to have a work, and the reason that men could work before a woman I don't know. Then Miriam had the idea to travelled to England to started a new life and to try to find a new job, but the problema was that in that country ot was more complicated because she was a girl and she was also a foreigner, so then that girl Miriam, started to be poor because she doesn't have enough Money top ay all things. Some days later she thought that how the problem of her there was a lot of more, so one day she thought to told all her friends to do a protest and tell everyone that they could and all girls that had that problem decided to have a protest, finally they took a lot of posters to do the protest. Also they did this because other problem with the work is that you can have a lot of careers but how there isn't many work sometimes you have to work which it isn't the career you have been studing because you wanted to work in a better work to live well but how there isn't many work you have to do other job although the pay you less money, this is another reason by the people do that protest, it is to complain. At first when she thought to do that she was nervous and confused because she didn't know if the people could go, but she thought that she told to a lot of people so she had to be sure because it was a lotof people.

They were preparing all things to do that and also, like in all and every protest they were during three days before or more, going into the streets to start to advertise and shout that they should go to do the demonstration that they were doing to help them. When the day of the protest arrived some girls didn't go because they thought that they weren't going to help actually , so the others girls weren't very confident to do it because they saw that there were less people that there were at the beggining, otherwise they do it, although then the protest was an absolutely disaster because nearly nobody came.

While the time pass Miriam didn't know what to do because she had to keep her family, in other words, she had to keep her husband, her daughter and her son, because her childs were in the school and they had to study, to ate and they needed a place to spend the day and the night. She was luckily but at the same time unluckily, because her husband losed her job during two months and her family was there to help them and after those two months her husband returned to find a job and this job was good because he won some money that helped them and their family started to stop to give them money because with the money of her husband they could survive during several months. Whereas they were thus, other people started to losed her work too and with all

happening the town hall began to rethink that they should have more jobs, so they could live in peace and relax, not even if been thus they didn't do anything.

Six months later of the demonstration, Miriam and her family, the same as other families had to leave their house because they couldn't pay the cost and they had to leave it. Fortunately, the mum of the father receive them in her house and they can live there, but Miriam doesn't like it because she wanted to live in her own house like before, so they thought to do something, and the idea was do another demonstration so she did it in four months after. The day of the protest was one year later of the last. When they do it, there were less people than the last time so they were less confident so they didn't do the protest because if they do it this protest didn't go to work by the fact that , people don't come or they were few, but when the people saw that, that protest didn't work, they wanted to do another, and this protest was better because she thought that they must do the protest also about the foreigners and how that was new they announced better and louder so a lot of people went to help them and to took a lot of signs and many posters, but one thing that Miriam there wasn't announced is that first she wanted to talk with the boss of the part of the work to gave them job, so the manager understood all and he gave work for mens and womens, in this way, the girls and others mens didn't have to do the protest and the manager decided to create more work rather than credited. Other problem was that he said that he was going to gave us work but he had to talk with other managers in the town hall and at the beggining, like I spected they refuse to give them more work but at the end they decided to give them it.

It was fantastic because that girl Miriam, could have work, although first she wasn't well paid but after some monhst she was improving and she had been weel paid because she did more things and with time she was understanding a lot of things. After a long time she leaved her mother-in-law house and she bought one house, her husband also started to work and her friends of the protest too, his childs started to live better and all was fantastic, so she was thrilled and enthusiastic to get all that she had in that moment considering everything that had happened. And all his friends appreciated it and her family congratulated her to get all that she had in that moment.

Finally she began to forgot all the thing that happened in the past, her feelings and now she is perfect because she doesn't have problems.

And this values are very important to keep the world in peace because it is very important to bear in mind t olive well and without problems.

Ángela Torralba Sánchez.
